

COMPANY PROFILE

TOA Electronics Pte Ltd

ABOUT US

At TOA we have made it our mission to supply you not just with high-quality equipment but above all with first-class sound. Whether in schools, concert halls, airports or stadiums. Our sound systems make millions of peoples' lives safer and more enjoyable. Consistently TOA has continued to strengthen its role as an innovative leader and redefined the standards of technical improvement. Founded 1934 in Kobe, Japan, we benefit from 90 years of experience in research, development and international sales and marketing of numerous products in the field of public address systems. Thereby our longstanding know-how guarantees proven quality and the upmost peace of mind.

Our pride is that we can use the knowledge in each of our business fields regarding to Voice Alarm Systems, Intercom Systems, Speakers, ProSound, Distribution, Wireless Systems as well as Conference Systems to create acoustic sound fields for millions of people to make their lives safer and more pleasant.

TOA Electronics Pte Ltd (TES) is located in Singapore since 2002 and has since become the regional office for Asia-Pacific with subsidiaries in Malaysia, Thailand, Vietnam, Indonesia and India.

In each of the Asia-Pacific countries we have authorised distributors, which take care of their country and your needs. TOA has a very good relationship to all of its distributors and is in constant communication to get best market knowledge.

PHILOSOPHY

- 1 Total confidence of our customers in the use of all products.
- 2 Total confidence of our associates in all business transactions.
- 3 Total confidence of our employees in all their efforts.

3 MAIN BUSINESS DOMAIN

01

PUBLIC SAFETY

Reassurance

Conveying information on disaster warnings and evacuation guidance rapidly to as many people as possible, we optimally exploit our technologies to implement a wide area disaster prevention system as a sound specialist manufacturer.

02

PUBLIC COMMUNICATION

Reliability

Information announcement which draws the attention of many circulating within the airport or station. Our system can be used to control broadcasting areas and accurately convey the required information to where it is needed.

03

PUBLIC SPACE DESIGN

Emotion

Sound support is key to enhance realism at sports events as well as a sense of unity at a concert hall. Through sounds, an audience within a large space can take in and share extraordinary experience.
